formstack

Transform the patient experience

Are paper forms slowing your organization down? Formstack empowers your team to build workflows that take the patient experience to the next level.

Online Forms
Patient Registration

A new patient finds the provider's site after an online search. Using an online form on the providers site, the patient is able to schedule an appointment and provide their medical history and insurance information.

Workflows
Appointment Check-In

The patient's information is automatically routed to the providers office manager for review prior to the appointment. The office manager notices an error in the patient's insurance information and sends it back to the patient to update.

eSignature + Document Generation
Patient Appointment

The provider is able to easily review the patient's medical history and adds notes to a dedicated section on the HIPAA compliant medical form. At the end of the visit, the provider electronically signs off on his section of the workflow form.

Survey + Calendar Integration
Patient Follow-Up

Once check-out is complete, the patient receives an email within seconds with a calendar invite for their next appointment. This email also includes a link to a patient satisfaction survey. If the patient rates the experience highly, they are routed to a page that asks them to share a review on a public site.

HIPAA Compliant Payment Integration
Check-Out

The patient checks out at the front desk and makes any payments through a HIPAA compliant payment integration. The office manager sees a note to schedule a follow-up appointment in two weeks. If needed, a treatment plan is automatically generated and sent to the patient's email.

formstack

Overcome the challenges of modern patient care

Spend less time worrying about workflows and more time with your patients. Enable your back office with the tools to build efficient processes without relying on IT.

Eliminate paper processes

Today's patients expect a digital-first experience. Speed up the patient intake process by allowing patients to complete their form before they step foot in your office.

Enhance patient care

Reduce your patients' frustrations by streamlining their experience within your practice. Combat medical errors by keeping electronic records of all your documents.

Maintain HIPAA Compliance

Have peace of mind knowing your patients' information is secured with data encryption. Strengthen control of patient data to avoid internal and external threats to sensitive information.

"Using Formstack reduces failure when bringing in new patients. It increases efficiency and cuts down on data entry for both patients and staff."

Dr. Chris Bojrab, President of Indiana Health Group

Healthcare solutions for every need

HIPAA Data Security

Safely collect and manage patient information with Formstack's HIPAA compliant data security solutions.
Medical Office Management

Formstack simplifies medical office management so you can be more productive and meet patient needs.

Patient Empowerment

Create seamless, personalized experiences that meet each patient's unique health needs.

Patient Onboarding

Boost productivity and enhance care by eliminating paper forms and switching to electronic workflows.

Healthcare Marketing

Make smarter decisions with tools that help you simplify workflows and turn more leads into long-term patients.
